APPLICATION:

RECOGNITION OF PRIOR LEARNING

ACC 77

Rope Rescue 2- NFPA 1006, 2013

First Name/s: _____

Surname: _____

ID Number: _____ Age: _____

Employer: _____

Postal Address: _____

(Where result and certificate/s should be sent)

Postal Code: _____

Tel No: _____ Fax No: _____

Cell No: _____ Membership No. _____

NB! Membership of the Institute is a prerequisite for application of RPL

PURPOSE:

The purpose of this procedure is to assess your academical qualification **in combination with your experience** to determine if accreditation for the Rope Rescue 2 qualification is appropriate. Any person with a Rope Rescue Qualification or equivalent (Portfolio of evidence) and **3 years Fire or Rescue Department service** and an acceptable **CV of appropriate** experience can apply.

ANNEXURE A

Employing Service <i>(Where you have worked/are working)</i>	Position/Rank <i>(Held or are holding)</i>	Date		Primary Functions <i>(What you were / are doing)</i>
		From	To	

ANNEXURE: B

C.V. - Rope Rescue 2, NFPA 1006, 2013
Standard for Technical Rescuer Professional Qualifications

This Annexure B should accompany your application for accreditation on the grounds of Recognition of Prior Learning for Rope Rescue 2 [Form: ACC 76].

Briefly describe your **Roll as Rope Rescuer in** the following activities. Use all the headings listed below in your CV. The purpose of this is to be able to have a realistic impression of your experience to be able to assess your application fairly.

If you attended any courses related to the Criteria described in the CV, copies of the certificates can be attached.

This CV is required in addition to a certified copy of your Rope Rescuer Qualification or higher qualification.

Note: Please use additional paper if the space provided is not adequate.

1. General Requirements.

- Discuss your involvement in the completion of an assignment while suspended from a rope rescue system in a high-angle environment, given a rope rescue system, an assignment, life-safety harnesses, litters, bridles, and specialized equipment necessary for the environment, so that risks to victims and rescuers are minimized; the means of attachment to the rope rescue system is secure; selected specialized equipment facilitates efficient rescuer movement; and specialized equipment does not unduly increase risks to rescuers or victims., as per NFPA 1006, 6.2.1

- Discuss your involvement in the movement of a victim as a rescuer in a high-angle environment, given a rope rescue system, a specified minimum travel distance for the victim, victim transfer devices, and specialized equipment necessary for the environment, so that risks to victims and rescuers are minimized; undesirable victim movement within the transfer device is minimized; the means of attachment to the rope rescue system is maintained; the victim is removed from the hazard; selected specialized equipment facilitates efficient victim movement; and the victim can be transported to the local EMS provider, as per NFPA 1006, 6.2.2

- Discuss your involvement in the functioning as a litter tender in high-angle lowering or hauling operation, given a rope rescue system, a specified minimum travel distance for the litter tender, life safety harnesses, litters, bridles, and specialized equipment necessary for the environment, so that risks to victims and rescuers are minimized; the means of attachment to the rope rescue system is secure; and the terrain is negotiated while minimizing risk to equipment or persons, as per NFPA 1006, 6.2.3

-
- Discuss your involvement in the directing of a team in the removal of a victim suspended from rope or webbing in a high-angle environment, given a victim suspended by a harness attached to anchored rope or webbing, devices for removal of the victim from the rope or webbing, and a means of removal of the victim to the ground or other safe area, so that risks to victims and rescuers are minimized, injury to the victim is minimized, the means of attachment to the rope rescue system is maintained, the victim is removed from the rope or webbing, and the victim is brought to a safe area for transfer to EMS, as per NFPA 1006, 6.2.4
-
-
-
-

- Discuss your involvement in the directing of a team in the construction of a system intended to move a suspended rescue load along a horizontal path to avoid an obstacle, given rescue personnel, life safety rope, rope rescue equipment, and a suitable anchor capable of supporting the load, so that personnel assignments are made and clearly communicated; the system constructed can accommodate the load; tension applied within the system will not exceed the rated capacity of any of its components' parts; a system safety check is performed; movement on the load is efficient, and loads can be held in place or moved with minimal effort over the required distance, as per NFPA 1006, 6.2.5
-
-
-
-
-

- Discuss your involvement in the directing of a team in the operation of a rope system to move a suspended rescue load along a horizontal path, given rescue personnel, an established system a target for the load, a load to be moved, and personal protective equipment, so that the movement is controlled; the load is held in place when needed; operating methods do not stress the system to the point of failure; personnel assignments are made; tasks are communicated, and potential problems are identified, communicated, and managed, as per NFPA 1006, 6.2.6
-
-
-
-
-

- Discuss your involvement in the accessing a victim in a high-angle environment using techniques that require rescuers to climb up or down natural or manmade structures given a belay, a belay system, or other mechanisms, so that the risks from a fall are minimized or eliminated; the patient is accessed; and the objective is achieved, as per NFPA 1006, 6.2.7

- Discuss your involvement in the isolate and manage of potentially harmful energy sources found in erected structures, including power systems and construction materials, given personal protective equipment, so that all hazards are identified, systems are managing, beneficial system use is evaluated, and hazards to rescue personnel and victims are minimized, as per NFPA 1006, 6.2.8
