Fire Inspector 3 - NFPA 1031, 2014

First Name/s: _____

Surname: _____

ID Number: _____ Age: _____

Employer: _____

Postal Address: _____

(Where result and certificate/s should be sent)

Postal Code: _____

Tel No: _____ Fax No: _____

Cell No: _____ Membership No. _____

PURPOSE:

The purpose of this procedure is to assess your academical qualification **in combination with your experience** to determine if accreditation for the Fire inspector 3 qualifications is appropriate. Any person with a Fire Inspector qualification or equivalent (Portfolio of evidence) and **36 Months firefighting service** and an acceptable **CV of appropriate** experience can apply.

PROCEDURE:

- Submit a certified copy of training attended which satisfy the requirements of NFPA 1031, chapter 6.
- Submit a certified copy of the course content and curriculum of course attended
- The decision of the Accreditation Committee will be final.
- After evaluation of the application, the applicant will be informed in writing of the outcome of the assessment and of what will be required for full accreditation, if applicable.
- If an application is made with any other qualification, not presented by SAESI, the curriculum of the qualification and **Portfolio of Evidence** of the student should be included.
- Application with regards to experience should be completed on annexure A & B. (No other CV will be accepted)
- Proof of Payment MUST ACCOMPANY application

ANNEXURE: B

C.V. – Fire Inspector 3, NFPA 1031, 2014

Standard for Professional Qualifications for Fire Inspector and Plan Examiner

This CV should accompany your application for accreditation on the grounds of Recognition of Prior Learning for Fire Inspector 3 [Form: ACC 194].

Briefly describe your **Role as Fire Inspector** in the following activities. Use all the headings listed below in your CV. The purpose of this is to be able to have a realistic impression of your experience to be able to assess your application fairly.

If you attended any courses related to the Criteria described in the CV, copies of the certificates can be attached.

This CV is required in addition to a certified copy of your Fire Inspector qualification or higher qualification.

Note: Please use additional paper if the space provided is not adequate.

6.2 Administration

This duty involves the recommendation, creation, and evaluation of policies and procedures for fire safety inspections and code enforcement activities, according to the following job performance requirements.

- **6.2.1** Generating written correspondence related to the issuance of appeals, given a request for an appeal, so that the resulting document clearly addresses the issue and is appropriate for the intended audience.

- **6.2.2** Facilitating code adoption and modification processes, given fire loss data and a demonstrated need or deficiency, so that the modification is written to address the identified need or deficiency.

- **6.2.3** Assessing the impact of proposed codes, ordinances, and other legislation, given draft documents, so that the impact of the proposal on fire safety and code enforcement activities is documented.

- **6.2.4** Developing policies and procedures for the administration of inspection functions, given management objectives, so that the policies are in accordance with the legal obligations of the jurisdiction.

- **6.2.5** Proposing technical reference material acquisition, given a scope of responsibility, budget limitations, and specific code-related issues, so that resources matching specific needs are acquired.

- **6.2.6** Enforcing permit regulations, given a permit application, or report of a violation and applicable codes and standards and policies of the jurisdiction, so that enforcement actions are taken in accordance with the applicable codes and standards and the policies of the jurisdiction and the violation is mitigated.

- **6.2.7** Initiating legal action related to a fire code violation, given a description of a violation and a legal opinion, so that the action taken is in accordance with the policies of the jurisdiction and due process of law is followed.

- **6.2.8** Recommending a program budget, given organizational goals and needs, budget guidelines, and organizational needs, so that overall program needs are addressed.

- **6.2.9** Evaluating inspection reports and completed forms and checklists, given applicable codes, standards, policies, and procedures of the jurisdiction, so that the information is correct, clear, and concise.

6.3 Field Inspection

This duty involves analysis of code compliance alternatives; evaluation of construction, occupancy, fire protection, and exposures; and emergency planning, according to the following job performance requirements.

- **6.3.1** Assessing alternative methods to adjust occupant loads, given a description of an area, building, or portion of a building and its intended use, so that the occupant load is in accordance with applicable codes and standards.

- **6.3.2** Evaluating corrective measures, given a list of means of egress deficiencies in a building and the proposed correction, so that each deficiency and its proposed correction are evaluated for compliance with applicable codes and standards and deficiencies are identified, documented, and reported in accordance with the policies of the jurisdiction.

- **6.3.3** Evaluating the construction type required for an addition or remodeling project, given a description of the building and its use, so that the construction type is evaluated based on applicable codes and standards and deficiencies are identified, documented, and reported in accordance with the policies of the jurisdiction.

- **6.3.4** Evaluating alternative protection measures of equipment, operations, and processes, given deficiencies noted during a field inspection of a facility and proposed alternative methods, so that the equipment, process, or operation is provided with a level of protection that is in compliance with the intent of applicable codes and standards.

- **6.3.5** Evaluating fire protection plans and practices, given a field report describing a facility housing a complex process or operation, so that the fire growth potential for all areas is determined, the level of protection is appropriate to the hazard and in accordance with the applicable codes and standards and the policies of the jurisdiction.

- **6.3.6** Recommending criteria for the development of emergency planning and procedures, given a description of a building and its use, so that plans and procedures are in accordance with the applicable codes and standards and the policies of the jurisdiction.

- **6.3.7** Evaluating compliance alternatives for the storage, handling, and use of hazardous materials, given field inspection reports and proposed compliance alternatives, so that the hazardous materials are provided with a level of safety that is in accordance with the intent of applicable codes and standards and the policies of the jurisdiction.

- **6.3.8** Evaluating compliance alternatives for the storage, handling, and use of flammable or combustible liquids and gases, given field inspection reports and proposed compliance alternatives, so that the storage, handling, and use is provided with a level of safety that is in accordance with the intent of applicable codes and standards and the policies of the jurisdiction.

- **6.3.9** Witnessing an acceptance test for an integrated fire protection system, given approved shop drawings, test protocols, and an installed system, so that system performance can be evaluated for compliance, and deficiencies are identified, documented, and reported in accordance with the applicable codes and standards and the policies of the jurisdiction.

- **6.3.10** Developing emergency access criteria, given the jurisdiction's emergency fire apparatus and fire suppression practices, so that fire suppression services can be delivered in accordance with the policies of the jurisdiction.

- **6.3.11** Evaluating compliance with construction documents, given a performance-based design, so that life safety systems and building services equipment are installed, inspected, and tested to perform as described in the engineering documents and the operations and maintenance manual that accompanies the design and deficiencies are identified, documented, and reported in accordance with the policies of the jurisdiction.
